

Workplace Specific Safety Training

Instructions

All personnel must receive workplace-specific safety training before starting research or other work in a laboratory. The Faculty/Safety Coordinator needs to discuss the applicable items on this sheet. The Emergency Procedures section **applies to everyone** and needs to be completed separately for each building work is performed in.

General hazard safety trainings, administered by the Safety Office, may be required based on the work hazards. Please refer to [Safety Training Matrix for Laboratory Personnel](#) to determine required general hazard safety trainings for Research personnel.

Maintain a copy of this completed form in the lab as part of the individual’s safety training documentation.
